	Examiner Jaison P. Thomas	Art Unit 1751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: minor grammatical errors. Applicant is respectfully suggested to review the disclosure for any grammatical errors.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 recites the limitation "conductive powder" in line 1. There is insufficient antecedent basis for this limitation in the claim.

For purposes of examination, the claim will be construed as reciting a "coating material" instead of "conductive powder."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1751

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayashi et al (US Patent 5529720).

Hayashi et al. discusses prior art methods of manufacturing ITO pigments by reacting water soluble tin and indium compounds with an aqueous alkaline solution and further firing the resulting co-precipitated hydroxides in open air to convert the hydroxides to oxides. Further Hayashi discusses a method of measuring the volume resistivity of the sample via a green compact test which examiner construes as requiring a material coated with the ITO pigments produced by the method discussed (Column 1, lines 64-68 thru Column 2, lines 1-10).

With respect to the claimed limitation of the yellow index of the ITO coating being greater than 15, the examiner respectfully submits that the prior art inherently meets the claimed limitation. Specifically, the reference teaches identical components made and is produced in the same or similar manner and would inherently possess the yellow index value required.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaison P. Thomas whose telephone number is (571) 272-8917. The examiner can normally be reached on Mon-Fri 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas McGinty can be reached on (571) 272-1029. The fax phone
